

VIDASHIELD™

FAST, CONTINUOUS UV-C AIR PURIFICATION

Taking Dental Safety to the Next Level
Build Loyalty, Attract New Clients by Improving Quality

Dentists and Orthodontists are taking patient safety to the next level.

Patients usually fear the dentist. Dental providers strive to find unique and proven ways to create safe environments which can have a tremendous impact on quality and patient experience, thus building loyalty with both patients and staff.

UV-C technology is a time-tested method of pathogen eradication. Integrating a shielded UV-C chamber into a light fixture allows for a more practical application in dental offices that maximizes coverage, eliminates human error and allows the system to operate unobtrusively and continuously in occupied spaces.

THE PROBLEM WE SOLVE

VidaShield eliminates a broad spectrum of microbes that cause infection. Healthcare providers have validated reductions by as much as 91% in the air & up to 69% from surfaces.

BACTERIA

FUNGI

VIRUS

OUR SOLUTION

Premium 2' x 4' light fixture integrated with UV-C

How It Works

- Air is drawn into an shielded UV-C chamber
- Infection-causing microbes are neutralized
- Clean air is then recirculated back into the room
- Exchanged volume of air is equivalent to a 10' x 10' x 8' room every sixteen minutes

WHAT MAKES US DIFFERENT

Integrating UV-C with a lighting system just makes better sense.

Room lighting by design, is positioned to maximize illumination making it ideal to maximize UVC coverage. The existing electrical source can be used. *No human intervention eliminates human error 100%.*

OUR RESULTS

| Study location | % Reduction in airborne bacteria | Notes |
|------------------------------|----------------------------------|------------------------------|
| Desert Springs Hospital | 80% $p = 0.0234$ | Surface bacteria reduced 69% |
| Driscoll Children's | 91% $p = 0.0002$ | Surface results inconclusive |
| Lowell General ICU | 79% $p = 0.0305$ | Surface bacteria reduced 57% |
| Lowell General OR Break Room | 81% $p = 0.0264$ | Surface bacteria reduced 48% |

OUR PROMISE

OUR PROMISE IS SIMPLE.

We guarantee improved outcomes or your money back.

Commit to installing the VidaShield solution and we guarantee that the product will substantially improve outcomes through the reduction of bacteria and fungi in the air.

Customer Satisfaction Guarantee

OUR COMPANY

The Global Leaders in
Scientific Lighting

USHIO

Advanced air treatment, powered by world-renowned electrical, medical and scientific innovation

- Over 50 years of experience
- More than 5,000 medical, scientific and UV lighting products
- Used everyday in over 10,000 hospitals, labs and healthcare facilities world-wide

THE ROI

VidaShield provides a strong return on investment. While dental providers may see an improved environment as the end goal, there are additional areas of return to consider.

Bacteria Reduction

Reducing bacteria in the air drives huge results in facility quality and can push financial return.

Absenteeism Rate

Dental Offices are a hub of activity creating an ideal environment to transmit infectious microbes.

New Patient Marketing

A stronger commitment to safety builds brand perception for prospective clients.

Risk Management

Dental Offices go to great lengths to eliminate risks. A zero tolerance approach must include air quality.
